

The Body's Expense Account

The 'currency' of the human body is a term which refers to the expenditure of energy. The currency which the human body uses to purchase life is a molecule called 'ATP' ... Adenosine triphosphate.

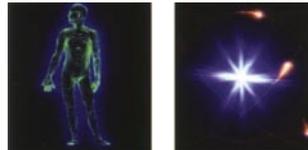

The 'MINT' where the currency is produced, is in fact inside every cell of the human body. The biological term for the MINT is the MITOCHONDRIA. In other words, the currency for life is a molecule called ATP. This provides the cell with energy, which is produced in the 'power house' of the human cell called the mitochondria.

The production of this energy, or ATP molecule, is dependent on nutrients entering the cell. Once inside the cell these essential nutrients are used in enzymatic dependent biochemical reactions. This series of reactions is known as the Krebs Cycle. The driving force of this cycle is an electric current or flow of electrons called the 'ELETRON TRANSPORT CHAIN'.

So the recipe for life is in cellular energy production. If our cells are able to do this correctly then we are well instead of unwell, we regenerate instead of degenerate, we anti-age instead of age. Our cells require energy to absorb nutrients. This energy (ATP) drives electric current gradients across the cell membrane in order to achieve normal cellular function.

The ATP required needs an electric current or Electron Transport Chain in order to be made by the cell. It has been shown that ultra low micro-currents increase ATP production by up to 500% [1].

Bioelectrical devices which offer ultra low amplitude of electron flow (current) to every cell to maximise the ability to produce cellular energy/ATP, and thus maximise cellular function, are widely used around the planet as a complementary therapy. The sequela of this is wellness, healing, regeneration of damaged tissue, vitality and anti-ageing.

Do you or someone you know suffer with chronic fatigue, arthritis, fibromyalgia, slow healing wounds, leg ulcers, back pain, recurrent infections, tiredness/lethargy or sports injuries? You may want to look further into this type of medicine working at a cellular level to enhance wellness and improve your expense account for health. www.bodihealth.com Ref: [1] Clinical Orthopaedics and Related Research Number 171, November - December 1982, pg 264-272

**DR JANE
CHAPMAN**

General Practitioner
MBBS, FRACGP

**Holistic Medical
Practitioner**
MBBS, FRACGP

Suite 1104-1105,
Level 1, TOWER 1,
SOUTHPORT CENTRAL,
Cnr Scarborough &
Lawson Streets, Southport.

Ph: 5503 1966

**BodiHealth
Technologies**

- General Practitioner • Allopathic Medicine
- Natural Hormone Therapy • Nutritional & Environmental Medicine
- Anti-Ageing Medicine • Intravenous Vitamin & Mineral Therapy
- Electrogenesis • Women's Health Practitioner
